

Project: Tolley Court

Project Location: Tolley Court, Hamilton Hill

Customer: City of Cockburn

Scope:

Hydra Storm provided engineering and supply of two FRÄNKISCHE infiltration storm water management systems.

The systems had to suit available space being an established residential area. Utilising the FRÄNKISCHE system we were able to maximise the available space offering a 4-layer and 3-layer tank system.

The FRÄNKISCHE Quadro Control Shafts installed on both systems will enable their serviceability for the life of the tanks.

Great solution for the residents of Tolley Court in Hamilton Hill and the City of Cockburn.

Products:

- 238x Rigofill ST-B Cubes
- 178x Rigofill ST-B Sidewalls
- 4x QC Shafts

Facts & Figures:

- Tank 1 - L 7.2m, W 3.26m, H 2.64m
Net Volume: 59.64m³, Footprint: 23.04m²
- Tank 2 - L 7.2m, W 3.26m, H 1.98m
Net Volume: 44.73m³, Footprint: 23.04m²
- Execution: August 2020
